

# SimVSM

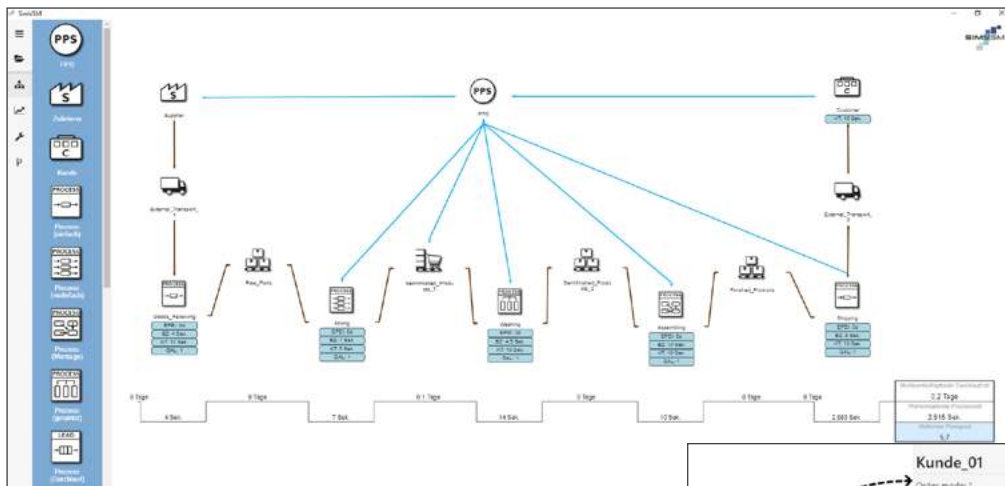

## The App for value stream analysis & simulation Paperless, fast, simple

With **SimVSM** you can create value streams fast and simple with a tablet. Transfer your value stream model via WebService to your simulation server and receive the simulation results in a short time.

**Record, document, simulate and analyse value streams on a tablet PC.**

Create models by Drag&Drop

Washing	
Is value-adding:	<input checked="" type="checkbox"/>
Number of workers: *	0
Setup time: *	00:00:00
Planned setup time / day: *	00:00:00
Availability: *	100
MTTR: *	00:00:00

You can set parameters and connect elements by clicking on a library element

Enter project settings:

- Products
- shift plans

Start the simulation out of the App and get the results automatically.

### How to get SimVSM:

**SIMVSM** is available free of charge for iOS, Windows and Android (In-App purchases available):

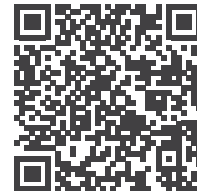

#### [iTunes App Store](#)

#### [Microsoft Store](#)

#### [Playstore/Android](#)

If you are interested in the SimVSM PRO version after the first testing and getting to know it, just contact us.

With SimVSM PRO, among other things, the connection to a simulation model via a web service (requires a license of the simulation software).

In addition, there are no restrictions the number of projects and alternatives.

We would be pleased to convince you of the advantages of our unique app for your value stream analysis! Just contact us.
